Gabriela Knop Marques

Frontend Web Developer

Berlin, Germany

knop.gm@gmail.com - 0176 36595273   knopgm.com   github.com/knopgm   linkedin

---

Business-Administrator-turned-Developer with more than 4 years of experience helping around 100 people. Achieved 20% of savings by negotiating and finding new and reliable suppliers. Eager to support the company and its stakeholders through clear communication, strategic organization and a problem-solving mindset.

WEB DEVELOPMENT PROJECTS

MyFlix   **view project**
- Built from scratch, using the modern Tech-stack MERN (MongoDB, Express, React and Node.js). Provide users, after a quickly registering, with a search tool to look into information about movies, directors and movie genres and to save their best movies on a favourite movie list.

Meet App   **view project**
- Developed a serverless app based on TDD (Test-Driven-Development) and PAWs (Progressive web application) that permits users to search for a list of events and their popularity in each city. It can be added to the home screen of users' devices and also save data to be checked offline.

Pokedex   **view project**
- Created a responsive web Application built with Javascript to load data from an external API, which allows users to search for information about their favourite pokemons;

TECHNOLOGIES: JavaScript, React, Node.js, MongoDB, Express, Angular, Typescript, React-Native
